[LeetCode](#) | [CodeChef](#) | [HackerRank](#) | [CodeForces](#)

Professional Summary

Dedicated Computer Science student with advanced problem-solving skills. Experienced in full-stack development and backend engineering using Java Spring Boot to architect scalable systems. Good practice with DevOps tools and CI/CD pipelines, collaborating effectively in Agile environments to deliver robust, production-ready solutions.

Education

KL University (KLU)

Bachelor of Technology in Computer Science & Engineering

GPA: 9.79

Guntur, AP

July 2024 – June 2027

AANM & VVRSR Polytechnic

Diploma in Computer Engineering (DCME)

GPA: 9.5

Gudlavalleru, AP

October 2021 – May 2024

Skills

- **Programming Languages:** Java, Python, C++, JavaScript
- **Web & Backend:** HTML5, CSS, React.js, Spring Boot, RESTful APIs
- **Tools & Cloud:** Git, AWS, Jenkins, Docker, GitHub Actions
- **Methodologies & Databases:** Agile Development, CI/CD, MySQL, MongoDB

Professional Experience

KKCC Infosystems

Web Developer Intern

Ongole, AP

December 2023 – April 2024

- Learned to architect and build real-world, production-ready systems utilizing React and Spring Boot.
- Optimized frontend architecture, decreasing page load times by 20% and improving cross-device UI responsiveness.
- Led a team to complete a production-ready Centralized Test Case Management System.

EduSkills

Java Full-Stack Intern

Remote

August 2024 – October 2024

- Executed full-stack development focused on Core Java, JDBC, and scalable server-side programming.
- Deployed a comprehensive web application integrating a Spring Boot backend with a structured SQL database.
- Utilized Agile methodologies and Git version control to accelerate project deployment timelines.

Projects

DeepFake Detection System | React, Spring Boot, ONNX, ConvNeXt

[Repo](#)

- Developed a high-accuracy application utilizing a React frontend and Java Spring Boot backend to detect whether media (images, videos) is fake or not.
- Integrated ONNX-based models (ConvNeXt, ViT) for advanced pixel-level scrutiny and frequency domain analysis.
- Optimized architecture with asynchronous processing (Celery/Redis), accelerating Error Level Analysis generation by 30%.

Online ATM | Java, SQL, Technologies

[Repo](#)

- Developed a secure ATM application with core banking functionalities using Java and SQL.
- Implemented reliable database transactions to ensure data integrity during user operations.

Music Streaming Web Application | React, Spring Boot, MySQL

[Repo](#)

- Architected a platform with secure JWT authentication and low-latency RESTful APIs for continuous audio playback.
- Designed a responsive UI, streamlining data retrieval and boosting overall user engagement.

Achievements

- **Certifications:** Completed **AWS Certified Cloud Practitioner** (CLF-C02) certification.
- **Consistency:** Maintained a **300+ day continuous problem-solving streak** on LeetCode.
- **Competitive Ranks:** Secured **State Rank 162** in ECET and **Rank 2973** in IIIT Entrance Examination.
